

Everyday Recycling Bingo

Scavenger Hunt

Many of our everyday objects are made up of recycled materials. Play a game of bingo and explore how some of the items you see and use are made from recycled plastic, paper, metal, and more.

What you will need:

- Bingo cards (provided)
- Bingo reference sheet (provided)
- Pencil

What to do:

- Walk around your home and in your neighborhood looking for the objects on the bingo card
- When you find one of the objects, mark the space on your card with a pencil
- Find the object on the bingo reference sheet to discover what recycled materials it is made from.
- Continue searching for objects. If you mark off all the spaces in a row or column, you have bingo! Try to get a blackout by marking all the spaces on the card

Bonus challenge: When you have found all the objects on one card, try again with the other card.
